**DETAILED ACTION**

1. Claims 1-27 are pending in this application.

***Election/Restriction***

2. Applicant's election without traverse of Group III (tetracyclic 1,4-thiazine compounds), Claims 6 and 8-10 (05/04/2005) is acknowledged. Claims 1-5, 7 and 11-27 are withdrawn from prosecution. Note that the new claims 18-27 are drawn to Group IV.

***Information Disclosure Statement***

3. Applicant's Information Disclosure Statements, filed on 10/12/2004 and on 7/15/2004 have been acknowledged. Please refer to Applicant's copies of the 1449 submitted herewith.

***Specification***

4. The disclosure is objected to because of the following informalities: at page 29 or elsewhere in the specification the term "1-naphphol" is misspelled. According to the chemical reaction (step c) at page 29, 1-naphthol reacts with 4-nitroaniline. Thus, applicants have to correct the misspelled term to "1-naphthol".

Appropriate correction is required.

***Claim Objections***

5. Claim 8 is objected to because of the following informalities: the term "1-naphhol" is misspelled (see above). It should read as "1-naphthol".
6. Claim 9 is objected to because of the recitation "Ar is the same as that defined in the claim 3". Claim 9 is an independent claim, thus, the definition of Ar should be recited in claim 9 as it was done in claim 10.
7. Claims 6, 9 and 10 are objected to because of the presence of dots on the right hand side of the chemical structures i.e. "... (10)", "... (11)", ".... (4)", ".... (5)", ".... (6)" and ".... (7)". Applicants have to remove these dots to overcome this objection.

Appropriate correction is required.

***Allowable Subject Matter***

8. Claims 8 and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
9. Claim 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Mann et al. (Journal f. Prakt. Chemie., 1981, Vol. 323, No. 5, pages 785-792). Cited reference discloses a compound of interest: 9-(diethylamino)-5H-Benzo[a]phenothiazine-5-one at page 788 (see Table 1, compound 1). Said compound of interest is the same as applicants when applicant's formula (10) has the following substituents:

The examiner has attached an English translation of said reference for applicant's convenience.

Since said compound is the same as applicants, the 102(b) rejection is proper.

***Claim Rejections - 35 USC § 112***

11. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1624

Claims 6 and 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. In claim 6 (at page 7), the phrase "formula (1)" lacks antecedent basis. Said phrase is recited in 4 places at page 7 (line 3, line 7, lines 9-10 and line 11). What is the chemical structure of formula (1)? There is no mention of formula (1) in claim 6. Do applicants intend formula (10)? If so, applicants have to amend said phrase from "formula (1)" to "formula (10)" to overcome the rejection.

Likewise, the same problem appears in claim 9. Applicants have also to fix the problem in claim 9.

b. In claim 10, the phrase "formula (10)" lacks antecedent basis. Claim 10 depends from claim 9, but there is no mention of "formula (10)" back in claim 9. What is the chemical structure of "formula (10)"? There is "formula 10" in claim 6, but claims 9 or 10 do not depend from claim 6.
